Tahir Pathan

Pune, Maharashtra | tahir.pathan88@gmail.com | GitHub | LinkedIn | +91-7020998968

Professional Summary

Full Stack Developer with 3+ years of experience building scalable web applications end-to-end. Deep experience across the stack with React.js, Next.js, TypeScript, Node.js/NestJS, and Python/FastAPI, backed by PostgreSQL and MongoDB, with working knowledge of AWS cloud services. Designed and developed RESTful APIs, microservices, authentication systems, and scalable application architectures. Currently building and integrating Generative AI and Agentic AI capabilities using LLMs, RAG, embeddings, vector search, LangChain, and LangGraph. Experienced with CI/CD, performance optimization, and Agile/Scrum methodologies.

Technical Skills

- **Languages**: HTML, JavaScript, TypeScript, Python.
- **Frontend**: React.js, Next.js, Redux, Tailwind CSS, Material UI (MUI), shadcn/ui.
- **Backend**: Node.js (Express.js, NestJS), FastAPI, Django.
- **AI & GenAI:** LLMs, RAG, Embeddings, Vector Search, Vector Databases, LangChain, LangGraph, AI Orchestration, OpenAI API, Gemini API, AI Agents, Tool Calling.
- **Databases**: MongoDB, PostgreSQL.
- **API & Validation**: RESTful APIs, CRUD Operations, API Integration, Zod, Microservices.
- **Data Libraries**: Pandas, NumPy.
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, API Gateway, CloudWatch), Docker, Firebase, Vercel, Render, Neon, CI/CD.
- **Testing & Tools**: Jest, React Testing Library, Git, GitHub, Bitbucket, Postman, Jira, Swagger.
- **Concepts**: Authentication & Authorization (JWT), Responsive Design, Performance Optimization.
- **Certifications**: Prompt Engineering Certification - UpGrad (2026) Advanced Prompt Engineering with ChatGPT.

Professional Experience

Software Developer
Broadstairs IT Solutions, Pune — Feb 2023 – Present

- Designed and developed scalable full-stack applications using React.js, Next.js, TypeScript, and PostgreSQL, improving application performance by 30%.
- Built reusable and modular UI components using Tailwind CSS and shadcn/ui, reducing new-feature development time by 25%.
- Developed RESTful APIs and CRUD endpoints using Node.js, Express.js, NestJS, and FastAPI, reducing API response latency by 30%.
- Integrated REST APIs using Axios and Redux for frontend-backend communication and state management, decreasing page load time by 20%.
- Optimized PostgreSQL and MongoDB queries and schemas to improve database performance and API response times.
- Implemented JWT-based authentication, authorization, and Zod request validation to support secure API access.
- Built and integrated backend services using a microservice architecture and Docker to ensure consistent development environments.
- Integrated Generative AI capabilities using LLMs, RAG, embeddings, vector search, LangChain, and LangGraph to build AI-powered application workflows.
- Delivered features end-to-end within Agile/Scrum sprints, contributing to code reviews, debugging, and testing using Jest and React Testing Library.

Projects

AI Study Assistant | Personal Project
Purpose: Empowers users to transform lengthy learning documents into structured, revision-ready study materials.
Tech Stack: Next.js 16, React.js, TypeScript, Python, FastAPI, PostgreSQL, pgvector, Redis, Celery, Docker

- Developed a full-stack AI-powered study assistant that converts uploaded learning documents into structured notes, flashcards, and quizzes.
- Built responsive interfaces using Tailwind CSS and shadcn/ui, with Zustand for state management.

- Implemented RAG-based retrieval using embeddings, pgvector, and vector similarity search to provide relevant context for LLM-generated study materials.
- Orchestrated document-processing, retrieval, and LLM-based generation workflows using LangChain and LangGraph.
- Built FastAPI services with PostgreSQL, SQLAlchemy, Redis, and Celery for document processing, data persistence, and asynchronous task execution.

Community Collaborative Application – Ummah Book

Tech Stack: Next.js, TypeScript, shadcn/ui, Tailwind CSS
Purpose: An app for community members to receive announcements, event updates, and prayer timings.

- Built a responsive Next.js + TypeScript web application enabling members to discover and manage nearby Masjids with search and filter functionality.
- Implemented login, dashboard, and responsive UI using Tailwind CSS and shadcn/ui, improving navigation and overall usability.
- Created a library of reusable UI components with shadcn/ui, improving maintainability and reducing development effort by 25%.
- Built real-time, location-based Masjid updates using the browser Geolocation API, ensuring relevant Masjid information based on the user's location.

Turf Management Application

Tech Stack: Next.js, TypeScript, Python (FastAPI)
Purpose: A platform for turf owners and players to manage bookings, scheduling, and availability.

- Built a full-stack turf management application with Next.js and FastAPI for user management, bookings, scheduling, and availability.
- Created a library of responsive UI components using Next.js, TypeScript, Tailwind CSS, and shadcn/ui, reducing development effort by 25%.
- Developed RESTful APIs with FastAPI covering CRUD operations for users, bookings, and turf data.
- Implemented booking workflows with availability checks and time-slot management, preventing double-bookings and reducing scheduling conflicts by 30%.

Coaching Management System

Tech Stack: React.js, Material UI, Redux, Node.js, NestJS, MongoDB, Postman.
Purpose: A platform for coaching centres to manage students, courses, attendance, and communication.

- Built student and teacher management features including enrollment, syllabus tracking, and attendance using React.js and Redux.
- Developed RESTful APIs with NestJS for user registration, course modules, and scheduling, and validated endpoints using Postman.
- Built responsive and reusable UI components using React.js and Material UI, improving consistency across student and staff workflows.
- Optimized MongoDB queries for dashboard rendering, reducing dashboard load time by 25%.
- Designed modular and reusable API structures to support maintainability and future scalability.

Memon ID – Social Community Portal

Tech Stack: React.js, Node.js (Express.js), MongoDB

- Built and launched a social community platform using React.js, Redux, Axios, and Material UI, supporting a growing and active user base.
- Designed and implemented a custom calendar component for events, reminders, and date management, improving data accuracy by 25%.
- Diagnosed and fixed critical issues in the calendar module, stabilizing calendar data and reducing related issues by 30%.
- Shipped features end-to-end using Express.js, MongoDB, and REST APIs, tracked via Jira and validated with Postman.

Education

Bachelor of Business Administration (BBA)
DR Kakade College of B. Com, BBA, BBA(CA), Pimpalwandi | Pune, Maharashtra
